To Whom It May Concern:

As a California Licensed Landscape Architect and owner of Pacific Greenscape, a landscape construction company, I have worked with many tree support systems. Recently we have discovered the U-RITE Tree Support System and have put it to the test on several important projects, including recently **Sunset Magazine's 2005 Idea House** in Ladera Ranch.

Working with you and using your UP-RITE tree supports has proven to be a positive and successful experience. The system provided excellent results in supporting the trees in an upright manner after transplanting them out of the nursery containers. It has held up through the winds and provided the support the trees need to develop into healthy mature trees while keeping them straight.

In addition to the excellent results we have had using your system; we have found the system to be very aesthetically pleasing and give our projects an edge over the competition. We have had very positive feedback from our customers and much inquiry regarding your product.

I congratulate you on your innovative idea and design of the UP-RITE Tree Support System and am looking forward to working with you and your product on future projects

Sincerely,

Jeff Rhode

Owner, Pacific Greenscape
