UP-RITE Tree Support Systems  
755 E. Lambert Road  
La Habra, CA 90631

Ref: UP-RITE

To Whom It May Concern:

As a builder and owner of several commercial projects in the City of Corona, I am concerned with the installation and maintenance of the common areas of our projects.

Last year, during the Santa Ana winds, we lost a couple of our large magnolia trees. They actually snapped off at the heads. After finding out about your product, we installed approximately 150 of your UP-RITE tree supports at our new Corona Pointe Business Park.

After a year, all trees we supported by UP-RITE arms are looking great. Your support is not only aesthetically pleasing, but also practically maintenance free. The trees supported by the wood staking system are still leaning after much maintenance and the high wind situation common to the area.

Congratulations on your superior tree support system. We will definitely be installing more of your UP-RITE tree supports on future projects to come.

Thanks,

Larry Haupert
